

For intelligence. For evidence. We're your point of difference

We've collaborated with you, our law enforcement partners, to ensure that CSAS V3 is more responsive to your needs and we're delighted to showcase even more functionality in this new release.

Upgrading to CSAS V3

CSAS V3 comes with enhanced functionality and new features. It's more powerful than V2 and more importantly, it's even more effective, providing true and real time collaboration to help your team save lives and solve problems quickly.

CASE HUB

Visualise all your data and mapping on a single screen

CASE OUTPUTS

Choose from standardised templates, fast time reports or build bespoke report templates

CUSTOM PIVOT TABLES

allow you to speedily deal with non-standard queries

Send queries seamlessly to i2 Analyst's Notebook without leaving CSAS

ENHANCED NMPR INTEGRATION makes it quicker and easier to look up device identifiers like IMEIs

IDENTIFIER SEARCH
The 'Search' pane allows you to quickly search, within all Cases that a user has permission to access, for different types of Identifiers including MSISDN, IMEI, IMSI, VRM, attribution name and Cell ID.

THE UNIFIED SIDE BAR gives you the power to define what you see, how you see it and how you export it

FIRST CALL LAST CALL now includes inactivity periods which fall outside normal daily patterns with no AM/PM restrictions

COLOCATION QUERIES provide an indication of the times when mobile devices and/or vehicles could be located within a defined area or could have been within a defined distance of a case location

GPS RECEIVER DATA can now be ingested directly into Case Hub supporting specialist teams including those working on MISPERs and Manhunts.

CSAS V3 can be deployed in a number of ways but our recommended deployment is:

Licensing

A self-hosted floating licence gives you flexibility to have multiple users sharing a common pool of CSAS licences, gaining maximum value from the solution, while having total control over management of the service, access and internal audits. Dedicated licences are available where partners need the option of one user per licence.

Case Data Management

With CSAS V3 Server case data is centralised and easily backed up reducing the risk of a single point of failure. You have the power to create user teams, set security levels for individual users, give read only access to non-case owners.

Our commitment to you

When you migrate to V3 our dedicated team is here to help. Conversion training for all current users is included in your upgrade through our trainer-led online bootcamp sessions or e-learning.

To plan your upgrade today please speak to your Account Manager, call 0800 158 3830 or email enquiries@forensicanalytics.co.uk
